THIRD GENERATION CHASSIS BRACE  
Part # CB002

INSTALLATION:

1. The vehicle must have a loaded suspension in order to install the brace. This may be accomplished with the vehicle on ramps or by using a 4 point service lift.
2. Loosen and remove the 4 bolts that fasten the front sway bar to the frame.
3. Position the brace between the frame mounts and the sway bar brackets (it will only fit one way).
4. Reinstall the 4 original bolts, clamping the BMR chassis brace between the frame mounts and the sway bar brackets. Retighten the bolts.
