

FOR IMMEDIATE RELEASE

**BMR Suspension Rear Suspension Kit for 1978-1987 GM G-Body Vehicles
\$539.95**

Launch harder, reduce wheel hop, and add cornering consistency on your 1978-1987 GM G-body with a Rear Suspension Kit from BMR Suspension. Manufactured from 1-1/2" and 1-5/8" DOM tubing, this kit includes upper control arms, lower control arms, and control arm reinforcement braces. The BMR Rear Suspension Kit (RSK028) uses greasable, 95-durometer, internally-fluted polyurethane bushings, which add a more responsive feel over the factory rubber bushings. Designed to work well for street performance, drag race, and handling applications. The heavy-duty construction of the upper and lower control arms eliminate flex, giving you much improved repeatability on the street, starting line, or in the corners. This kit is the perfect upgrade for the enthusiast looking to improve performance, while maintaining acceptable NVH and ride quality. Installation time is 3-4 hours. Available in black hammertone or red powdercoat. Proudly made in the U.S.A.!
