

FOR IMMEDIATE RELEASE

**BMR Suspension Lowering Springs for 1982-1992 GM F-Body
SP096 \$239.95**

Improve the cosmetic appeal and increase the handling capabilities of your 1982-1992 GM F-body with Lowering Springs from BMR Suspension. Manufactured from chrome silicon high-tensile spring wire, these springs are cold wound on a CNC coiling machine that can adjust the spring diameter in real time to ensure that every spring is exactly the same. The BMR Lowering Springs (SP096) lower the center of gravity to allow the body to stay flat and level in the turns, while remaining soft enough for a comfortable ride on any road. These springs will lower your F-body 1.25-inches and feature a fine-tuned spring rate (620 lb/in front, 160 lb/in rear) to give you a smooth ride and great looks. BMR designed the SP096 springs for street performance, but it also works well for the occasional track outing. Like all BMR lowering springs, the SP096 has a LIFETIME guarantee against spring sag. Available in red powdercoat for long-lasting good looks. Installation time is about 3-4 hours. Proudly made in the U.S.A.!
