

## Motor Mount Installation Instructions

### TOOLS REQUIRED:

- Jack and jackstands
- Ratchet
- Sockets –13mm deep, 15mm deep
- Extension
- 10mm wrench
- Pliers or cutoff tool

### INSTALLATION:

1. Disconnect battery using 10mm wrench
2. Using 15mm socket and extension, remove driver and passenger upper motor mount nuts as shown in **IMAGE 1**.
3. Lift vehicle and support securely with jack stands. Using an engine support bar or jack, support the engine.
4. Remove four 13mm bolts from passenger side engine stand as shown in **IMAGE 2**.
5. Install passenger side motor mount using supplied 15mm hardware as shown in **IMAGE 3**. Assemble loose until all of the bolts are in place

# Motor Mount Installation Instructions

**NOTE:** ¼" shims are included to raise the engine back to stock height **IMAGE 9** Removing one shim will lower the engine ¼" Removing both shims will lower the engine ½"

**NOTE:** If the engine needs to be lowered ½" or more there is a 4.25" long bolt included to be used in conjunction with **MM007** (pictured below) The **MM007** engine stands also use ¼" shims (Part number: **BMR1008**) This combination can adjust engine height from stock all the way to 1" drop so long as clearance allows.
