

FOR IMMEDIATE RELEASE

**BMR Suspension Front Bumper Support for 2024-Current S650 Mustangs**

**BSF771 - \$129.95**

Reduce front end weight and improve the performance of your S650 Mustang with a Front Bumper Support from BMR Suspension! Factory bumper supports add a ton of unnecessary weight to your vehicle when it comes to racing. Manufactured from 1.25-inch Chromoly steel tubing, BMR's Front Bumper Support (BSF771) shaves off 8.6 pounds from the front end of your Mustang. The BSF771 eliminates the radiator shutter control assembly from the front of your Mustang, ensuring maximum weight savings. BMR's BSF771 features a 100% bolt-on design to promote a quick and efficient installation process. BMR's Front Bumper Support weighs only 1.4 pounds and serves as a great lightweight alternative to the factory support.

BMR Suspension has designed the BSF771 for street performance, drag racing, and road racing applications. The BSF771 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all BMR Suspension products, the BSF771 is proudly designed and made in the USA!
