

FOR IMMEDIATE RELEASE

**BMR Suspension Level 2 Handling Package for 1978-1987 GM G-Body  
HPP048 - \$2229.00**

Improve overall handling in your 1978-1987 GM G-Body with a Level 2 Handling Performance Package from BMR Suspension. This kit consists of a BMR Sway Bar Kit (SB031), 1.5-inch Lowering Springs (SP035), upper and lower A-arms (AA030), Rear Suspension Kit (RSK468), Bilstein front and rear shocks (BSN-G-78-87), and replacement A-arm hardware (RH007). BMR tubular sway bars add increased sway bar rate, which decreases body roll. BMR springs are constructed from high tensile silicone chromium spring wire and come with a lifetime warranty against spring sag. The BMR A-arms reduce deflection and improve alignment consistency, while increase handling feel. BMR's Rear Suspension Kit features everything you need to upgrade the rear suspension with no compromises. The Bilstein shocks offer high levels of performance and a great ride on any road. The Level 2 Handling Package (HPP048) will lower the center of gravity, decrease body roll, and dramatically increase the cornering capabilities of your G-Body. All components also sold separately. Sway Bars, A-Arms, and Rear Suspension Kit available in black hammertone or red powdercoat finishes. Installation is 6-7 hours. Proudly designed and manufactured in the U.S.A. When performance is a must, rely on BMR Suspension!
