

FOR IMMEDIATE RELEASE

**BMR Suspension Double Adjustable Panhard Rod for 2021-2025 Broncos**

**PHR1864 - \$299.95**

Eliminate bushing deflection and add suspension control to your 6<sup>th</sup> Gen Bronco with a Panhard Rod from BMR Suspension! Factory Panhard rods with soft rubber bushings can be weak and allow for excessive deflection in hard off-roading situations. Manufactured from heavy-duty 1.5-inch DOM steel tubing, BMR's Double Adjustable Panhard Rod (PHR1864) maintains alignment of the rear axle to control lateral movement and dramatically reduce Panhard rod deflection. The PHR1864 features heavy-duty, Teflon-lined rod ends for double adjustability, giving you greater suspension control over your Bronco during off-roading adventures. In addition, these rod ends eliminate bushing deflection, ensuring greater handling and off-roading performance capabilities. For those needing greater adjustability and strength within their Bronco's suspension, the PHR1864 is the Panhard rod you need.

BMR Suspension has designed the PHR1864 for off-roading and street performance applications. The PHR1864 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all BMR Suspension products, the PHR1864 is proudly designed and made in the USA!
