

FOR IMMEDIATE RELEASE

BMR Suspension Sway Bar Kit for 1964-1972 GM A-Bodies

SB400 - \$399.95

Improve handling, reduce body roll, and increase cornering stability on your 1964-1972 GM A-Body with a Sway Bar Kit from BMR Suspension! Designed from 1.25-inch (front) and 1-inch (rear) DOM steel tubing, BMR sway bars are cold formed to better resist torsional fatigue and retain 'memory' far longer than conventional hot-formed bars. BMR's Sway Bar Kit (SB400) gives you up to a 400% (front) and 200% (rear) increase in sway bar rate over the stock bars, reducing body roll and improving handling. The SB400 features a 2-hole adjustable front sway bar and non-adjustable rear bar, giving you the ability to fine-tune your vehicle's suspension! Included with this sway bar kit are greaseable, 88-durometer polyurethane bushings that greatly reduce deflection over the rubber bushings. Thrust washers are also used to locate the sway bars and eliminate lateral movement under aggressive cornering.

BMR Suspension has designed the SB400 for street performance, autocross, and road racing applications. BMR's SB400 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 2-3 hours. The Front (SB401) and Rear (SB402) sway bars included in this kit are also available separately. As with all BMR Suspension products, the SB400 is proudly designed and made in the USA!
