

FOR IMMEDIATE RELEASE

**BMR Suspension 1994-2004 Mustang Weld-On Sub-frame Connectors  
SFC025 - \$239.95**

Reduce chassis flex and improve handling on your 1994-2004 Mustang with weld-on full-length sub-frame connectors from BMR Suspension. Since the Fox, SN95, and New Edge chassis are not a full frame, the chassis flexes dramatically even with mild amounts of torque and horsepower. Manufactured from a mix of 1.5- x 2-inch steel tubing and laser-cut CNC-formed 3/16-inch steel plate, these sub-frame connectors add loads of strength in all the right places. The BMR Weld-On Sub-Frame Connectors (SFC025) solidly link the front and rear sub-frames of your Mustang, and tie into the rear section of the front seat mounts. BMR has designed the SFC025 for street performance, drag race, and handling applications. The SFC025 is available in black hammertone and red powdercoat for long-lasting good looks. Installation time is about 2-3 hour. Proudly made in the U.S.A.
