

FOR IMMEDIATE RELEASE

**BMR Suspension Shock Mount Kit for 2024-Current S650 Mustangs**

**SM772 - \$349.95**

Strengthen the chassis of your S650 Mustang with a Shock Mount Kit from BMR Suspension! The chassis of your Mustang can flex dramatically on the street and track, even with mild amounts of horsepower and torque. BMR's Shock Mount Kit (SM772) dramatically increases chassis stiffness on your S650 by linking the rear shock mounts with the included strut tower brace to firm up the chassis. The SM772 is manufactured from heavy-duty steel plate and tubing and includes Teflon-lined rod ends to provide you with the best in durability and performance. When looking to improve handling on the street and track, the SM772 is the kit you need to dominate your competition!

BMR Suspension has designed the SM772 for street performance, drag racing, and road racing applications. The SM772 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 2-3 hours. BMR also offers the Rear Shock Mounts (SM770, \$159.95) and Rear Strut Tower Brace (STB762, \$209.95) separately. As with all BMR Suspension products, the SM772 is proudly designed and manufactured in the USA!
