

FOR IMMEDIATE RELEASE

BMR Suspension Camber Bolt and Stud Kit for 1997-2004 and 2005-2013 Corvettes

WAK550 - \$369.95

Improve camber and alignment adjustability on your C5 and C6 Corvette with a Camber Bolt and Stud Kit from BMR Suspension! The suspension control arms on your Corvette can undergo serious wear over time, causing the factory frame inserts and eccentric cams to eventually fail and produce inconsistent handling characteristics. BMR's Camber Bolt and Stud Kit for Upper and Lower Control Arms (WAK550) replace those weak factory components to improve camber and alignment adjustability. The WAK550's included heavy-duty aluminum shims and studs replace the upper front and rear control arm bolts with studs to prevent wear on the frame during alignment changes. Laser-etched camber lockout plates are also included to allow for camber adjustments from -2.1 to +1 degrees. For those looking to improve their camber adjustability and suspension control, BMR's WAK550 kit is the perfect upgrade for your Corvette!

BMR Suspension has designed the WAK550 for street performance, road racing, and handling applications. The WAK550 is available black anodized and zinc-plated for a durable finish, and installation takes about 3-4 hours. BMR's Stud Kit (WAK551) and Camber Bolt Kit (WAK552) are also available separately. As with all BMR Suspension products, the WAK550 is proudly designed and made in the USA!

For those with C6 Z06 and ZR1 Corvettes, a different Camber Bolt and Stud Kit is required. For these vehicles, BMR recommends its WAK560 kit.

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
