

FOR IMMEDIATE RELEASE

BMR Suspension Camber Bolt and Stud Kit for 2014-2019 Corvettes

WAK570 - \$609.95

Improve camber and alignment adjustability on your C7 Corvette with a Camber Bolt and Stud Kit from BMR Suspension! The suspension control arms on your Corvette can undergo serious wear over time, causing the factory frame inserts and eccentric cams to eventually fail and produce inconsistent handling characteristics. BMR's Camber Bolt and Stud Kit for Upper and Lower Control Arms (WAK570) replace those weak factory components to improve camber and alignment adjustability. The WAK570's included heavy-duty aluminum shims and studs replace the upper front and rear control arm bolts with studs to prevent wear on the frame during alignment changes. Laser-etched camber lockout plates are also included to allow for camber adjustments from -2.1 to +1 degrees. For those looking to improve their camber adjustability and suspension control, BMR's WAK570 kit is the perfect upgrade for your Corvette!

BMR Suspension has designed the WAK570 for street performance, road racing, and handling applications. The WAK570 is available bare for a durable finish, and installation takes about 3-4 hours. BMR's Stud Kit (WAK561) and Camber Bolt Kits (WAK572) are also available separately. As with all BMR Suspension products, the WAK570 is proudly designed and manufactured in the USA!

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
