

FOR IMMEDIATE RELEASE

BMR Suspension Caster/Camber Plates for Coil Over-Equipped 2011-2014 S197 Mustangs and Shelby GT500s

WAK752 - \$179.95

Add caster and camber adjustability, and fix alignment issues on your coil over-equipped 2011-2014 Mustang and Shelby GT500 with Caster/Camber Plates from BMR Suspension! The factory alignment adjustability can be insufficient when you lower your Mustang. Manufactured from heavy-duty laser-cut steel plate, BMR's Caster/Camber Plates (WAK752) are designed to add caster and camber adjustability to your Mustang's front suspension that is not available from the factory. The WAK752 provides a total camber range of 1.75 degrees with its high-quality, Teflon-lined spherical bearings and 100% bolt-on design. For those looking to correct the alignment on their 2011-2014 S197 and add aggressive alignment settings for track days, the WAK752 is for you.

BMR Suspension has designed the WAK752 for coil over-equipped street performance, drag racing, and autocross applications. The WAK752 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all BMR Suspension products, the WAK752 is proudly designed and made in the USA!

To preview all of BMR's high-performance suspension parts, please visit www.bmrsuspension.com, email sales@bmrsuspension.com, or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
